## Aula.

When creating our Aula multipurpose chair, the designers and engineers took plastic as a material to a new aesthetic and functional level. Up to 16 of the easy-care fully plastic chairs can be stacked free-standing. Aula looks intriguingly seamless because the colours and surfaces of all the chair's parts are the same. Its precise lines and the way the leg frame, armrests and seat shell fuse with the rest of the structure suggest an organic sculpture. The form, elasticity and ergonomic design of the seat shell provide excellent support and comfort, even when people of all shapes and sizes sit on it for long periods of time. Six colours and four types of upholstery tap into a wide range of furnishing and design options for multipurpose facilities, canteens, seminar rooms, conference areas or co-working spaces.

Design: Wolfgang C.R. Mezger

## Function

Lightweight, stackable, all-plastic multipurpose chair. Because of the shape, elasticity and ergonomic design of the seat shell, Aula is very comfortable to sit on for long periods of time. Six colours (two of which are on request) and four upholstery options tap into a wide range of furnishing and design options for multipurpose spaces, canteens, seminar- and conference-centres or co-working spaces.

## Frame/armrests

All-plastic frame made of through-dyed, fibreglass-reinforced ultramid in white, black, grey, grey-beige, as well as blue-grey on request, with multipurpose glides, optionally with felt glides, optionally with or without armrests in the same material and colours.

## Seat and backrest

Unitary, ergonomically moulded seat shell with through-dyed, fibreglass-reinforced polypropylene to match the frame and armrests in white, black, grey, grey-beige plus blue-grey on request. Model 238/11 with seat cushioning, model 238/12 with padding on the inside (=single-piece seat

and backrest cushioning) each with replaceable upholstery element made of plywood and breathable polyurethane foam. Model 238/13, fully upholstered, plywood shell with single-piece seat and backrest cushioning made of polyurethane foam, shell fully covered in fabric.

## Accessories

Permanent inline connectors made of bent steel, zinc-plated in black, purely a linkage option for chairs without armrests (retrofitable). Inline connectors in combination with a writing tablet on request. Variable, pull-out inline connectors made of bent steel, zinc-plated in black, with a clip made of fibreglass-reinforced polyamide in anthracite to provide a variable linkage option for chairs with armrests and chairs with and without armrests (retrofitable). Inline connectors in combination with a writing tablet on request. Magnetic clip for seat and row numbering made of plastic in anthracite, can optionally be slotted onto the frame on the right or the left. Number tags with white figures on steel plate in anthracite. Fold-up writing table, top made of HPL in black, connector made of black plastic (retrofitable). Only for chairs with armrests, stacking capabilities are retained.

## Dimensions, weights

Chair without armrests: Seating height 45 cm, total height 81 cm, width 55 cm, depth 57 cm  
Chair with armrests: Seating height 45 cm, total height 81 cm, width 67 cm, depth 63 cm, depth 57 cm  
Centre-to-centre distances: when linked without armrests: 550 mm  
when linked with and without armrests: 600 mm  
when linked with armrests: 640 mm  
Weight: 6 kg without armrests, 6.75 kg with armrests  
Maximum number of chairs that can be stacked:  
16 free-standing, stacking height 211 cm  
10 on a four-wheeled trolley, stacking height 182 cm  
Height between chairs when stacked: 90 mm

## Standards

Based on the DIN EN 16139 office chair standard, up to 10 chairs can be stacked vertically. The ANSI/BIFMA X 5.1 standard is complied with.

## Please note

stacking the plastic chairs can cause shine and pressure marks.

**190** Inline connector **extendable** for linking chairs with/with armrest and with/without armrest

**191** Inline connector **permanent** for linking chairs without/without armrest

Row widths and distances differ depending on whether Aula is used with or without armrests. Adjustable inline connectors allow linkage of both chairs with armrests and chairs alternately with and without armrests. Non-adjustable inline connectors are available when only chairs without armrests are used.

To number seats and rows, a practical magnetic clip with space to insert the numbers is slotted onto the frame. The fold-up writing tablet can be attached to and locked into place on the armrest in no time without compromising the chair's stacking capabilities.

- 192** Clip for seat and row numbering can be slotted onto the right or the left, magnetic
- 193** Seat number tags (set of 1-50)
- 194** Row number tags (set of 1-30)
- 195** Magnetic clip for number tags
- 196** Number tag board for 50 tags, magnetic

**197** Writing tablet

If required, the black fold-up writing tablet can be attached to the armrest and detached again just as quickly.

**198** Binders for number tag boards – not pictured
